VanRozgar

Resource images catalogue

Every forest resource sold on VanRozgar, with its picture, name and file name. For the website and app teams.

Version 1 | 28 October 2026

51	43	8	8
resources in total	pictures ready	still pending	picture groups

What is inside

1. How to use this catalogue and the image files
2. Status of all 51 resources: what is ready, what to check later, what is pending
3. One overview page for each of the 8 picture groups, then one large page for each picture
4. The pending resources

Pictures are made in one shared 3D style. They are AI-generated illustrations, not photographs.

How to use this catalogue

The files

Each picture has two files in the zip, VanRozgar_resource_images.zip:

- original_png: 1254 x 1254 pixels, PNG. Use for detail pages and large views.
- app_jpg_1024: 1024 x 1024 pixels, JPG, smaller. Use for lists, cards and thumbnails.
- manifest.csv and manifest.json: one row for each resource, with its id, group, names, what it gives, status and notes. Read these to connect pictures to the app data.

File names are group_plant, for example fruit_mango.png. Bamboo is bamboo.png. The "id" in the manifest is the file name without the extension.

Showing the pictures in the app and website

Every picture has a flat pista green background (#E4EDCB). Show it inside a rounded panel of that same colour, as on the website cards. It then looks right in both the light and dark themes, with no background removal.

Do not stretch or recolour the pictures. Keep them square.

Mango has one picture for both Amba and Amba (grafted).

Safety

Bibba (marking nut) and Gunj Vel (red seeds) are NOT for eating. Show "Not for eating" with these two products.

The shared picture style

Every picture uses the same low round beige platform, a plain pista green background, soft light from the top left, and the same three-quarter view. Containers are terracotta clay, wood or woven bamboo. There is never any text or logo in a picture.

Colours used on the site and app (light theme)

Primary green	Heading green	Pista	Beige	Brown	Orange
#4E7A3A	#2F4A2A	#DDE8C6	#F7F2E8	#5A3B22	#A4551A

Orange is only for prices and small highlights, never for a button fill.

Status of all 51 resources

Group	Resources	Ready	Check later	Pending
Bamboo	1	1	0	0
Fruit	10	10	3	0
Nuts and oil seeds	4	4	3	0
Flowers	3	3	0	0
Medicine and herbs	7	7	2	0
Forest produce	4	4	0	0
Timber trees	10	9	1	1
Shade and sacred trees	5	5	1	0
Not sure yet	7	0	0	7
Total	**51**	**43**	**10**	**8**

Note: the Timber trees row counts 10 resources (9 ready, 1 pending). The count of 8 pending is the 7 plants not identified yet plus Shisam. "Check later" pictures are ready to use, but should be compared with a real photo when there is time.

Check later (ready, but worth a second look)

Bor (Fruit)
The fruits look a little large. Check against a real ber photo.

Karvand (Fruit)
Looks very close to Jambhul (dark purple fruit). A smaller, rounder fruit mixed with a few pink-white ones, and a thorny twig, would set it apart.

Khirni (Fruit)
Can look like small mangoes. Check against a real Khirni photo.

Karanj (Nuts and oil seeds)
Plausible, but check the seed shape against a real karanj photo.

Koshimb (Nuts and oil seeds)
Looks like sunflower-style seeds. Check against a real Kusum seed photo.

Bibba (Nuts and oil seeds)
Check against a real photo. Safety: the raw nut sap can irritate the skin and the nut is toxic if eaten. Show 'Not for eating' with this product.

Hirda (Medicine and herbs)
Looks darker and more elongated than typical harad.

Tetu (Medicine and herbs)
Confirm the plant and what villagers collect.

Shisu (Timber trees)
Shisu and Shisam look alike. Confirm this picture is Shisu. If it is Shisam, then Shisu is the missing one.

Shami (Shade and sacred trees)
The picture has a pink-orange flower that was not asked for, and the leaves may not match a real Shami.

Bamboo

1 picture ready

Picture style for this group

A healthy bamboo clump in a wide clay pot on the round platform, with 2 cut poles lying in front to show what is sold.

Bamboo

Bamboo

Bamboo

What it gives	Bamboo poles for building, fencing and crafts
Group	Bamboo
File name	bamboo.png
Status	Ready

Fruit

10 pictures ready

Picture style for this group

A clay bowl of whole fruit on the round platform, with fruit lying beside it, one cut open to show the inside, and fresh leaves.

Amba
Mango

Awla
Amla (Indian gooseberry)

Sitaphal
Custard apple

Jambhul
Jamun

Bel
Bael

Bor
Ber (Indian jujube)

Chinch
Tamarind

Karvand
Karonda

Kawath
Wood apple

Khirni
Khirni

Amba

Mango

What it gives	Mango fruit. This one picture is used for both Amba and Amba (grafted).
Group	Fruit
File name	fruit_mango.png
Status	Ready

Awla

Amla (Indian gooseberry)

What it gives	Sour fruit, eaten fresh or dried
Group	Fruit
File name	fruit_awla.png
Status	Ready

Sitaphal

Custard apple

What it gives	Sweet, creamy seasonal fruit
Group	Fruit
File name	fruit_sitaphal.png
Status	Ready

Jambhul

Jamun

What it gives	Dark purple fruit, eaten fresh or made into juice
Group	Fruit
File name	fruit_jambhul.png
Status	Ready

Bel

Bael

What it gives	Hard-shelled fruit used for drinks and in Ayurveda
Group	Fruit
File name	fruit_bel.png
Status	Ready

Bor

Ber (Indian jujube)

What it gives	Small sweet and sour fruit, eaten fresh or dried
Group	Fruit
File name	fruit_bor.png
Status	**Ready, check later**
Note	The fruits look a little large. Check against a real ber photo.

Chinch

Tamarind

What it gives	Sour pods used in cooking, chutneys and sauces
Group	Fruit
File name	fruit_chinch.png
Status	Ready

Karvand

Karonda

What it gives	Small fruit used in pickles
Group	Fruit
File name	fruit_karvand.png
Status	Ready, check later
Note	Looks very close to Jambhul (dark purple fruit). A smaller, rounder fruit mixed with a few pink-white ones, and a thorny twig, would set it apart.

Kawath

Wood apple

What it gives	Hard-shelled fruit with brown, sour-sweet pulp
Group	Fruit
File name	fruit_kawath.png
Status	Ready

Khirni

What it gives	Small yellow-orange fruit
Group	Fruit
File name	fruit_khirni.png
Status	Ready, check later
Note	Can look like small mangoes. Check against a real Khirni photo.

Nuts and oil seeds

4 pictures ready

Picture style for this group

A small woven bamboo basket of nuts or seeds spilling onto the round platform, with a few on a fresh leaf.

Kaju
Cashew

Karanj
Pongamia (karanj)

Koshimb
Kusum (to confirm)

Bibba
Marking nut

Kaju

Cashew

What it gives	Raw cashew nuts, sold before shelling and roasting
Group	Nuts and oil seeds
File name	nuts_kaju.png
Status	Ready

Karanj

Pongamia (karanj)

What it gives	Seeds pressed for oil
Group	Nuts and oil seeds
File name	nuts_karanj.png
Status	**Ready, check later**
Note	Plausible, but check the seed shape against a real karanj photo.

Koshimb

Kusum (to confirm)

What it gives	Oil seeds
Group	Nuts and oil seeds
File name	nuts_koshimb.png
Status	Ready, check later
Note	Looks like sunflower-style seeds. Check against a real Kusum seed photo.

Bibba

Marking nut

What it gives	Nut used in traditional medicine. NOT FOR EATING.
Group	Nuts and oil seeds
File name	nuts_bibba.png
Status	Ready, check later
Note	Check against a real photo. Safety: the raw nut sap can irritate the skin and the nut is toxic if eaten. Show 'Not for eating' with this product.

Flowers

3 pictures ready

Picture style for this group

A fresh flowering branch standing in a small clay vase on the round platform, with 2 or 3 fallen flowers.

Moh
Mahua

Hadga
Agati (to confirm)

Bakul
Bakul

Moh

Mahua

What it gives	Flowers (dried for food and drink) and seeds (pressed for oil)
Group	Flowers
File name	flowers_moh.png
Status	Ready
Note	The picture shows the flower branch, a dish of seeds and whole green fruits.

Hadga

Agati (to confirm)

What it gives	Large edible flowers
Group	Flowers
File name	flowers_hadga.png
Status	Ready

Bakul

What it gives	Fragrant cream flowers
Group	Flowers
File name	flowers_bakul.png
Status	Ready

Medicine and herbs

7 pictures ready

Picture style for this group

A stone mortar with a wooden pestle and the dried herb, a jute sack spilling more, loose pieces, a leafy sprig and jute twine. Pods and bark are tied in a bundle.

Behda
Baheda

Hirda
Harad

Ritha
Soapnut

Bahava
Amaltas (golden shower)

Ashok
Ashoka

Tetu
Oroxylum (to confirm)

Gunj Vel
Gunj (Abrus)

Behda

Baheda

What it gives	Dry fruit used in Triphala, an Ayurvedic mix
Group	Medicine and herbs
File name	herb_behda.png
Status	Ready

Hirda

Harad

What it gives	Dry fruit used in Triphala, an Ayurvedic mix
Group	Medicine and herbs
File name	herb_hirda.png
Status	Ready, check later
Note	Looks darker and more elongated than typical harad.

Ritha

Soapnut

What it gives	Dried berries used as a natural cleaner
Group	Medicine and herbs
File name	herb_ritha.png
Status	Ready

Bahava

Amaltas (golden shower)

What it gives	Long pods, used in traditional medicine
Group	Medicine and herbs
File name	herb_bahava.png
Status	Ready
Note	Confirm with villagers what they collect from this plant.

Ashok

Ashoka

What it gives	Bark, used in traditional medicine
Group	Medicine and herbs
File name	herb_ashok.png
Status	Ready

Tetu

Oroxylum (to confirm)

What it gives	Long flat pods and bark
Group	Medicine and herbs
File name	herb_tetu.png
Status	**Ready, check later**
Note	Confirm the plant and what villagers collect.

Gunj Vel

Gunj (Abrus)

What it gives	Red seeds with a black spot. POISONOUS, NOT FOR EATING.
Group	Medicine and herbs
File name	herb_gunj.png
Status	Ready
Note	Safety: the seeds are poisonous. Show 'Not for eating' with this product.

Forest produce

4 pictures ready

Picture style for this group

A round woven bamboo tray of the produce, with one piece that shows where it comes from (a log, pod or fruit bunch), a leafy sprig and loose pieces.

Babhul
Babul

Kahandol
Gum karaya tree (to confir

Shendari
Annatto

Shindi
Wild date palm (to confirm

Babhul

Babul

What it gives	Gum from the tree bark
Group	Forest produce
File name	forest_babhul.png
Status	Ready

Kahandol

Gum karaya tree (to confirm)

What it gives	Gum from the tree bark
Group	Forest produce
File name	forest_kahandol.png
Status	Ready
Note	Matches the star-shaped red pods of the gum karaya tree. Confirm the name with villagers. The finish is slightly more photo-like than the rest.

Shendari

Annatto

What it gives	Red-orange dye seeds
Group	Forest produce
File name	forest_shendari.png
Status	Ready

Shindi

Wild date palm (to confirm)

What it gives	Small dates and palm leaves
Group	Forest produce
File name	forest_shindi.png
Status	Ready
Note	Confirm the plant with villagers.

Timber trees

9 pictures ready

Picture style for this group

A young tree, knee height, in a terracotta pot on the round platform, with 2 or 3 fallen leaves. These are sold as saplings, not as wood.

Pandhara Khair
White khair

Tambda Khair
Red khair (catechu)

What it gives	Sold as saplings
Group	Shade and sacred trees
File name	shade_kate_pangara.png
Status	Ready

Pending resources (8)

These pictures are not made yet. Seven plants are not identified yet: the villagers need to tell us what they are before we can make a picture. Shisam is either missing or is the picture filed as Shisu.

Resource	Group	Note
Shisam	Timber trees	Missing, or it is the Shisu picture. Please confirm.
Jambta	Not sure yet	Plant not identified yet
Ratangunj (Vanjyot)	Not sure yet	Plant not identified yet
Papda / Waval	Not sure yet	Plant not identified yet
Surangi	Not sure yet	Plant not identified yet
Lal Bhendi	Not sure yet	Plant not identified yet
Buch Pangara	Not sure yet	Plant not identified yet
Paayar	Not sure yet	Plant not identified yet

For the 7 unidentified plants, use the "young tree in a pot" picture style as a placeholder, and match the real leaf shape once the plant is known.
